

## 2015-2016 Technical Clarification #4 (August 26, 2015) Pre-Novice Spins: Feature #10 (8 revolutions)

This clarification has either been developed by Skate Canada or received from the ISU Technical Committees and/or Sports Directorate. Any further official clarifications provided by the ISU after the date of this communication will take precedence and will be communicated via this website.

This season's [Program Requirements documents](#) contain additional information. Please consult this document, the [ISU website's Questions and Answers and Technical Panel Handbooks](#) and the clarifications below. If you still require clarification, please submit a [Clarification Request](#).

---

**NOTE: This clarification is a revised version of [Question 2.2 in Technical Clarification #3](#). The previous version is correct and the following clarification adds additional information in *bold italics*.**

**1.0 If a spin contains 5 features including the successful performance of 8 revolutions resulting in that feature not being needed to achieve a Level 4, can the 8 revolutions feature be counted as a feature in any spin performed later in the program?**

No. *Skate Canada Levels of Difficulty / ISU Communication 1944* states that the feature of 8 revolutions "[...] counts only once per program (in the first spin it is successfully performed) [...]". The application of this feature does not represent a change from past practice.

***This rule is the same for Pre-Novice singles as well, even though the maximum is Level 3 for all spins. In other words, if a Pre-Novice skater completes 4 features in a given spin, one of which is a feature #10 (8 revolutions), this feature will be counted towards Level 3 in the first spin it is successfully completed.***
